

INTRODUCTION

Warehouse operations involve activities such as receiving, storage, picking, packing and dispatch, which may expose workers to various workplace hazards. This training provides essential knowledge and practical awareness to help participants work safely, prevent accidents, and maintain a safe and efficient warehouse environment.

OBJECTIVE

Participants will benefit by being able to:

- Identify hazards and risks associated with warehouse operations
- Apply safe work procedures in handling materials and equipment
- Use appropriate PPE and maintain safe work practices
- Understand forklift, traffic, and storage safety requirements
- Respond appropriately during emergency and incident situations
- Report hazards, unsafe acts, and near misses effectively

COURSE CONTENTS

Introduction & Legal Requirements

- Importance of warehouse safety
- OSHA 1994 and legal responsibilities
- Duties of employers and employees
